the binding company

# Metalbind®

OPUS the binding company

The most recognized binding system in the world.

## Secure

Protecting your documents by clamping them between covers with a robust Metalbind channel to keep them safe.

## Universal

Coping with many types of original documents, maps, plans thick or thin, without fear of damage between covers solid or clear by a Metalbind channel, plus easy to de-bind with our special tool. No punching, no gluing.

## Popular

Used all over the world by small businesses to corporations, universities, schools and local governments for presentations. Storage of precious documents always looking perfect when needed.

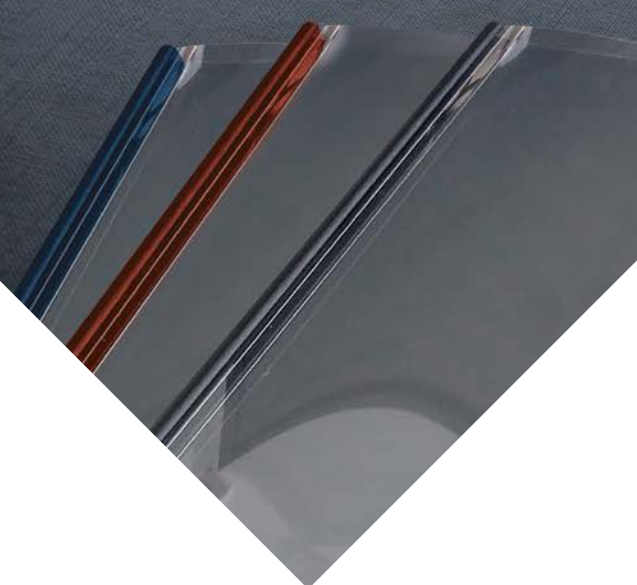

## Elegant

Interchangeable impressive colourful covers, with or without windows, hard, soft or clear, richly embossed with gold or silver. Makes your presentations or reports stand out from all the others.

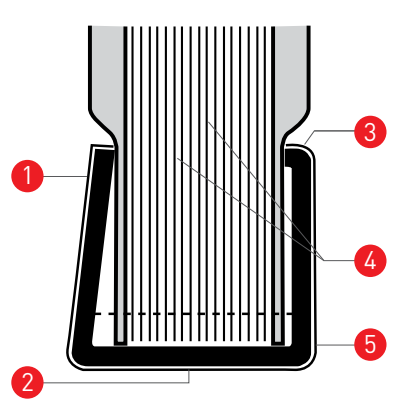

## Rugged

No fear of losing documents or misshaped presentations, using time after time lasting for a long time.

*Perfect Boom*  
KATALOG SPRZĘTU WYSTAWIENNICZEGO  
BY EXPO STOP

### Patented system:

1. The back of the channel is bent in to hold covers and pages firmly.
2. The channel is lined with a special tape and then covered with embossed linen textured covering ready for hot print stamping.
3. The special shaped channel gives a perfect presentation of the documents.
4. No damage to pages by the channel.
5. The front face of the channel is never deformed.

### Patented COVERguide®

The special COVERguide system allows covers and documents to slide easily into the channel.

Special protrusions each end centres the document in the Metalbind channel precisely and protects against movement.

The design of the edges make the covers fit perfectly into the channel.

OPUS MB 300

Documents bound and embossed by using OPUS Metalbind & Goldcover machines.

OPUS MB 300  
-el office

## OPUS MB 300

The METALBIND MB300 is the flagship of OPUS binding machines for professionals.

Solid metal construction, ergonomic lever, power pressure indicator and ability to bind and debind up to 300 sheets of 80gsm paper makes it the favorite model of every copy shop in Europe.

Pressure indicator for large binding runs of documents gives a signal when the correct pressure for Metalbind channel is reached to avoid damage. 10 pressure levels, angled bed for ease of use, front binding slot.

You can easily bind thesis books, photobooks, business books, e.g. tenders, reports, proposals and much more in a few seconds.

## OPUS MB 300-el office

The METALBIND MB300-el office is an electric easy-to-use binding equipment, which binds and debinds documents up to 300 sheets of 80gsm paper.

One movement of the lever holds the channel in place and then binds your documents by pressing the buttons. Adjustable binding force and the LED display indicating binding pressure up to 2.3 tons. COVERguide system helps work fast when binding many documents.

## OPUS MBE 300

Electric version of the most popular Metalbind MB300 binding machine. It binds and debinds up to 300 sheets of 80gsm paper with ease and speed. The LCD display shows binding speed along with information regarding number of documents bound.

## OPUS Atlas 190

The METALBIND Atlas 190 is a professional binding machine which binds and debinds documents up to 190 sheets of 80gsm paper.

With a huge range of cover styles and sizes - this solidly built machine is great for binding pre-foiled covers or corporate printed covers with amazing simplicity. With no holes, glue or electricity you can bind a hardback book in just 10 seconds.

## OPUS Atlas 300 mono

The METALBIND Atlas 300 is a professional binding machine which binds and debinds documents up to 300 sheets of 80gsm paper using METALBIND hard covers / channels.

This makes it a perfect machine for the production of thesis books, photobooks, business books, ie. tenders, reports, proposals and much more. You can also bind A5, A4 and A3 landscape covers in the same machine.

Atlas 300 is the only model on the market that may optionally include stamping head – IMAGE PRESS.

Foiling Head, Fonts, Foils & Frames sold separately.

OPUS the binding company

## Power of tradition

Traditional channel based binding system for school & university.

The highest durability and ease of use make it everlasting. Documentation looks noble and dignified.

Either professional service-providers or local student's workshop would appreciate the variety of consumables and possibilities of customization.

## Variety of use:

### **Service:**

master thesis's, doctoral dissertations, letters, albums, chronicles, books etc.

### **Office:**

business offers, agreements, price lists, menus, conference schedules, plans, rapports, certificates, diplomas, procedures etc.

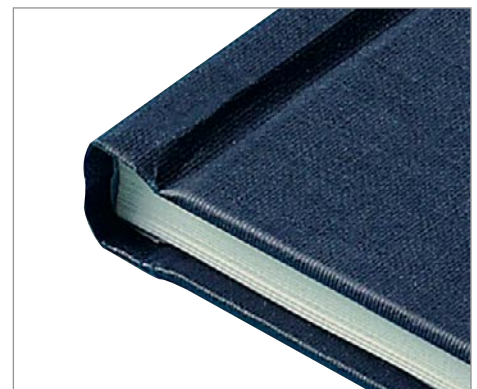

### **School & University:**

congratulatory letters, diplomas, books, bachelor thesis's

and much more...

### **Channel binding system:**

Documents can be bound in premium quality hard & soft covers. The channel is hidden inside the spine.

### **IMPORTANT!**

All the OPUS channel binding machines work under both METALBIND & C-BIND SYSTEMS.

It makes our solutions simple and universal.

Choose among variety of OPUS machines: Easy 120, ATLAS serie (190, 300 mono), MB 300, MB 300 el-office and MBE 300.

OPUS the binding company

# the Easiest and Simplest way of BINDING in Soft & Hard COVERS

## What are the advantages?

Once you have the equipment, all you need to do is place the pages in either a hardback or paperback cover and stick the book in the machine. The heat inside the device will cause the adhesive to melt a bit, securing the pages.

## Where to use it?

Thermal binding is perfect for documents requiring a highly polished look.

Offers, advertising materials, price lists, manuals, plans, procedures, recipes, certificates, diplomas...

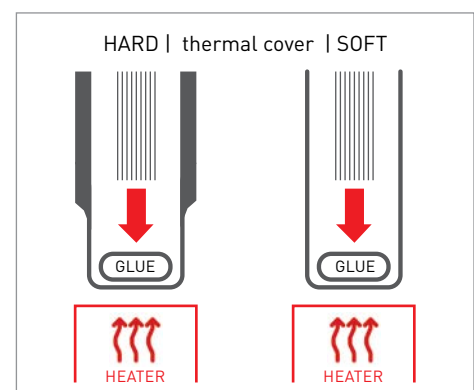

# what else?

PRACA  
MAGISTERSKA

## Thermal binding system:

Documents can be easily bound in quality hard & soft covers.  
The thermal glue is placed inside the spine.

## IMPORTANT!

Choose among variety of soft and hard covers offered by OPUS Company.

We produce high-performance machines specially designed to use with OPUS consumables. See our DUO 500 Vario Temp.

<b>0.Thermolin- en Plain</b>	Thermal soft covers fabric textured front & back. Colours: navy blue, black, green, maroon.	
<b>0.Thermotop Double Clear</b>	Thermal soft covers transparent front & back with a metal channel covered with leather texture. Available in several colours.	
<b>0.Neocover</b>	Thermal soft covers transparent front & back with minimum spine coverage of the front page. Available in several colours.	

● **soft covers**

**TERBIND customized soft covers**

***0.Thermo PERSONAL***

*Create your own design!*

We also offer customised soft thermal covers. You can design the artwork (CMYK 4/0 or CMYK 4/4) yourself! Available A4 (304 x 212 mm) format and all (MINI - 50 mm) sizes.

**Goldcover**

OPUS the binding company

The perfect  
equipment and finish  
for you documents!

**Goldcover system enables you to add personalised foil to your products.**

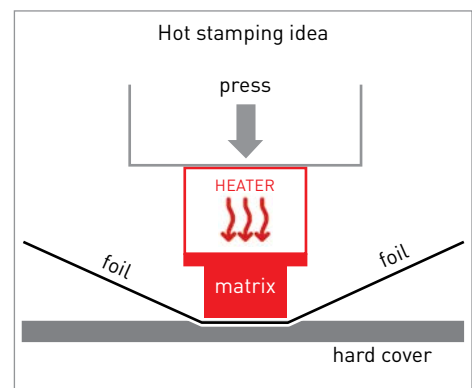

**Uses:**

master thesis's, doctoral dissertations, albums, chronicles, books, congratulatory letters, diplomas, books, bachelor thesis's, menus etc.

Create not only the personal matrix, but compose the text as well. Express yourself, communicate with your customer, close, friend!

**Hot stamp foiling & embossing:**

heavy duty press module together with a heater allow user to foil & emboss on many kinds of material. We recommend OPUS hard covers (Metalbind, C-Bind).

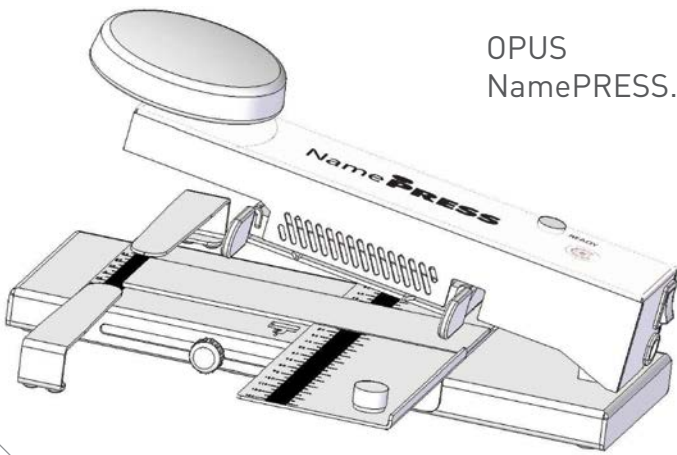

**IMPORTANT!**

Choose among variety of GOLDCOVER machines: NamePRESS for personal use, Goldpress 4+, 5 for office and Masterpress serie for professionals.

**NEW machines!**

# Name PRESS

OPUS  
NamePRESS. **NEW** design!

## NAMEPRESS PERSONALISATION

Add your custom text  
(e.g. name, surname)  
to the document  
(notebook, diary etc.)

## Technical data

name	NamePRESS
power	AC 230 V 50/60 Hz (0.5 A)
rated current	100 W
dimensions (H x W x D) mm	135 x 280 x 280 mm

## Goldcover

OPUS the binding company

### OPUS Goldpress 4+

Professional hot print stamping machine used for customizing all types of hard and soft covered presentations with many possibilities. You can also use it for printing on the covered METALBIND channels. See the table with accessories. Available many font & matrix frames, typeface styles and foils.

### OPUS Goldpress 5

The NEW easy to use bigger and better Goldpress 5, perfect for your hot print foiling, embossing for small or larger text and logos, for all types of covers: hard, soft, plastic, leather, textured surfaces. Now you can print **on the whole length of the covered channels** from the Metalbind system due to the openings on each side, letting you move the channel to any position. The Goldpress 5 gives you a **100 x 200 mm** surface to print with plus more opportunities.

With the Goldchannel base set\* you can foil on Metalbind channels or Channelbind spines.

\* sold separately

## Goldcover

US the binding company

### Technical data

### OPUS Masterpress 02

The perfect mid-range foiling solution. The NEW Masterpress 02 manual machine is compact, lighter and ergonomically designed to be more comfortable to use. Increased height between the table & the heater gives flexibility & ease of operation. Re-designed handle - allowing for right or left hand use. Square heater head - 20x20cm - allows access from side or front, making foil set up much easier & faster.

Slide out table enables easier positioning of small items - eg. business cards - more accuracy = less waste. Compatible with all Goldpress 5 matrixes & accessories.

### OPUS Masterpress EMD

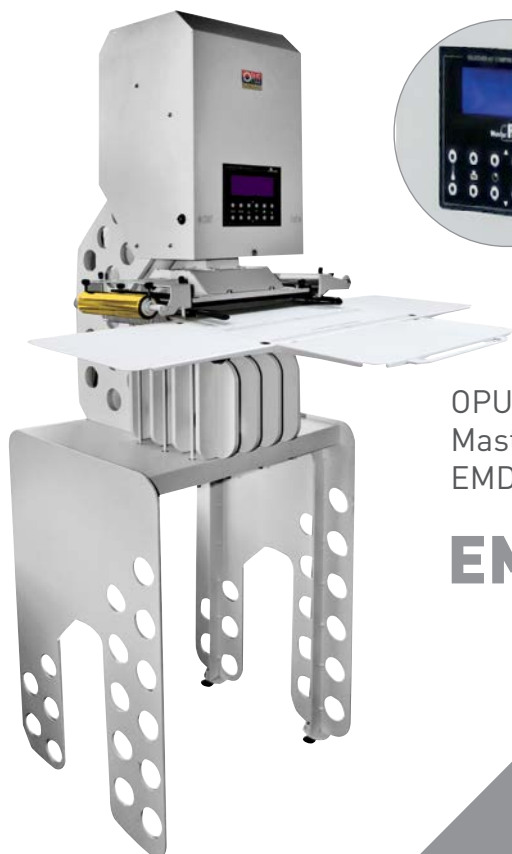

The Electric Masterpress is a vertical foil blocking machine with an A4 heat block area. The Masterpress can be used with magnesium, brass or copper matrixes - attached with heat tape or screws. It can also be used with Opus brass letters for easy type-setting - perfect for names, titles, thesis books, year books, photo books and more. Perfect for foiling on case covers, books, cards & much more.

The electronic display shows adjustable temperature (50 to 150 deg C), pressure time, pressure, foil length, height control & counter.

With up to 5 tons of pressure, the foiling machine is a versatile option for small print firms new to foiling or a short run vertical print option for the experienced foiling company with larger machines.

# Make your own professional wall calendar. The only thing you need is **Multipress 52**

## Two machines in one

Multipress 52 is designed to easily make a thumb cut on the edge of the calendar in preparation for binding them with twin loop wire and a calendar hanger.

Just exchange the punching module for the binding one. In a few minutes the calendar is ready!

## Have a try!

### ● Thumb cut wire binding:

Wall calendar bound by Multipress 52

### IMPORTANT!

Ask for accessories for Multipress 52. Available modules for punching & wire closing (also with thumb cut option)

## NEW!

## OPUS Multipress 52
